

Sustainable Development Goals: Ukraine

N A T I O N A L C O N S U L T A T I O N S

Kyiv, July 2016

In 2000 the United Nations Millennium Declaration identifies the targets of global development 2015 – the Millennium Development Goals (MDGs). The UN Summit convened in 2010 for a major review of progress against the MDGs initiated a first intergovernmental dialogue on the substantive preparations for the post-2015 global development agenda.

In 2012 the Rio+20 Conference on Sustainable Development the Governments of UN Member States made proposals for a new set of goals, to be named the ‘Sustainable Development Goals’ (SDGs). It launched a process of formulation of

the new development goals over the next 15 years, with a deadline of 2030.

The new SDGs were adopted by world leaders in September 2015 at the United Nations Sustainable Development Summit. UN General Assembly Resolution ‘Transforming Our World: the 2030 Agenda for Sustainable Development’ identifies 17 SDGs and 169 supporting targets.

SDGs serve as benchmarks for setting goals at the national level and a monitoring tool to measure social progress in 193 countries.

Sustainable Development Goals

	Goal 1. End poverty in all its forms everywhere		Goal 10. Reduce inequality within and among countries
	Goal 2. End hunger, achieve food security and improved nutrition, and promote sustainable agriculture		Goal 11. Make cities and human settlements inclusive, safe, resilient and sustainable
	Goal 3. Ensure healthy lives and promote well-being for all at all ages		Goal 12. Ensure sustainable consumption and production patterns
	Goal 4. Ensure inclusive and equitable quality education and promote life-long learning opportunities for all		Goal 13. Take urgent action to combat climate change and its impacts
	Goal 5. Achieve gender equality and empower all women and girls		Goal 14. Conserve and sustainably use the oceans, seas and marine resources for sustainable development
	Goal 6. Ensure availability and sustainable management of water and sanitation for all		Goal 15. Protect, restore and promote sustainable use of terrestrial ecosystems, sustainably manage forests, combat desertification, and halt and reverse land degradation and halt biodiversity loss
	Goal 7. Ensure access to affordable, reliable, sustainable and modern energy for all		Goal 16. Promote peaceful and inclusive societies for sustainable development, provide access to justice for all and build effective, accountable and inclusive institutions at all levels
	Goal 8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all		Goal 17. Strengthen the means of implementation and revitalize the global partnership for sustainable development
	Goal 9. Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation		

National consultations on adaptation of Sustainable Development Goals (SDGs) for Ukraine

MINISTRY OF ECONOMIC DEVELOPMENT AND TRADE OF UKRAINE

5–6 July 2016, Kyiv

“ Sustainable Development Goals should set up a platform for drafting the national strategies over the next 15 years ”

Ms. Yulia Kovaliv, the First Deputy Minister of Economic Development and Trade of Ukraine.

The national consultations involved around 300 participants representing government institutions, UN Agencies, academia, civil society and think tanks.

During the consultations seventeen SDGs were discussed according to four areas: Sustainable Economic Growth & Employment, Equitable Social Development, Effective, Accountable & Inclusive Governance & Justice for All, Environmental Sustainability & Resilience Building. Results of the consultations will be captured in a National Baseline Report “Sustainable Development Goals: Ukraine”.

Participants worked in roundtable groups and discussed contextualization of global SDGs in Ukraine taking into account national realities. During the consultations, attendees completed a questionnaire designed to highlight the most relevant goals for Ukraine and the most important actions to be taken in order to integrate the SDGs in existing national strategies and plans. More than 130 questionnaires demonstrating experts’ opinion were processed and summary survey results presented in the following graphs.

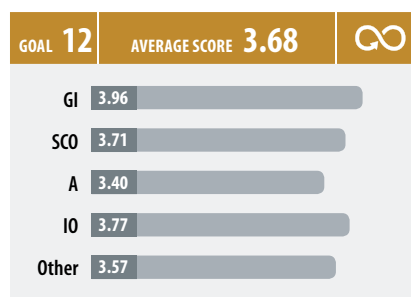

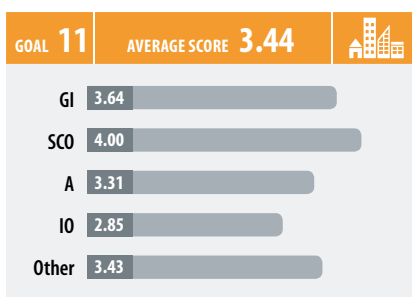

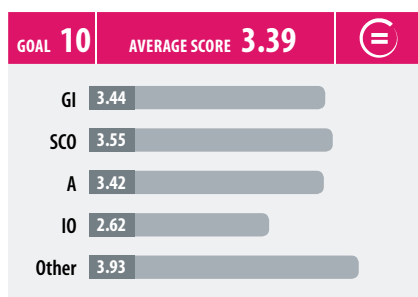

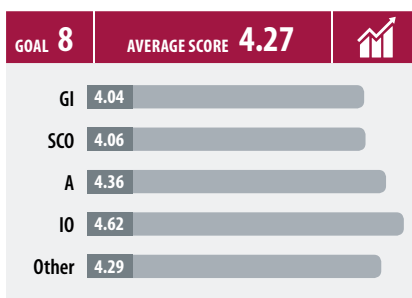

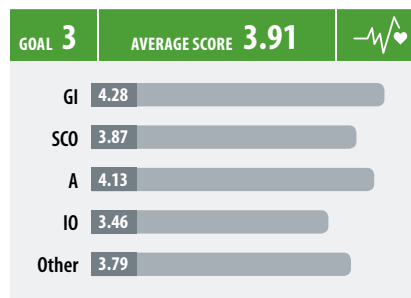

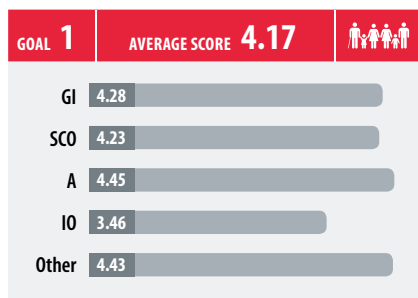

Ranking the Goals

17 Goals: results of expert opinion

(experts evaluated relevant goals for Ukraine on a 5-point scale: 1 – minimum, 5 – maximum)

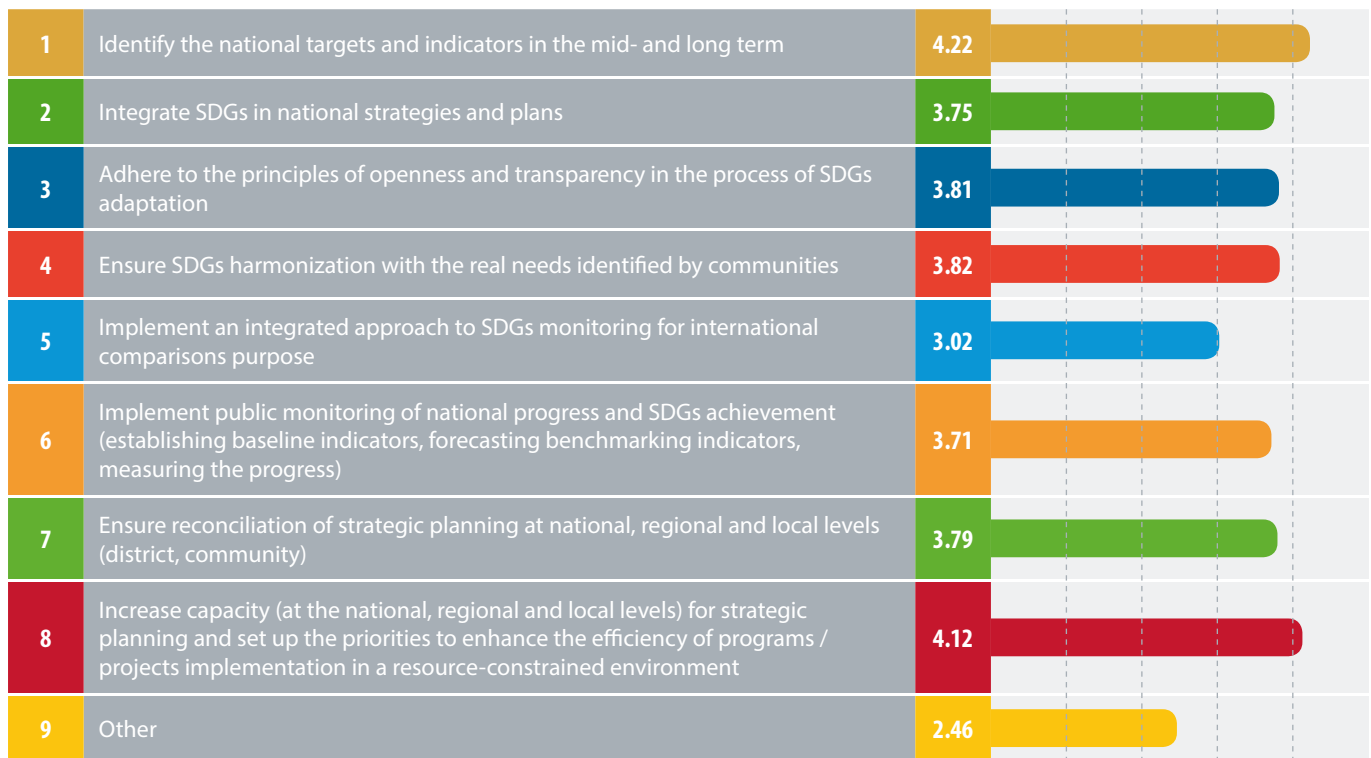

Legend:
 GI – government institutions
 SCO – civil society organizations
 A – academia
 IO – international organizations
 Other – other organizations

Primary actions to be taken in the process of SDGs integration

(Average score, based on a 5-point scale: 1 – minimum, 5 – maximum)

The results of the National consultation prove that Ukrainian society stands ready to draft new long term development strategy that will specify and articulate the SDGs and targets to be reached by 2030. In a traditional development model of Ukraine the challenge is to manage trades-off between three goals: fostering economic growth and competitiveness, reducing social inequalities and preserving the natural resource base. A sustainable development model consider these three objectives as mutually reinforcing rather than seeing them contradictory.

National Report “SDGs: Ukraine” will be designed in this spirit: national targets require a consistent integration of efforts aimed at jointly inducing a new type of economic growth, responding to the aspiration for social justice and taking care of the environment. Considering the current development process in Ukraine, this approach requires a change in mindset, an in-depth socio-economic transformation and new types of partnerships.

A pre-requisite for achieving each and every SDG will be the move towards high-quality governance which include staff competence, simplification of the administrative structures, eradication of corruption, and a genuine commitment to social support. Accordingly, the issue of proper governance, fair and transparent authorities, and people’s participation in decision-making and accountability mechanisms should be introduced in the formulation of the various goals.

A crucial factor of success in SDGs monitoring is the strengthening of the statistical capacity in the local and central administrations of the country so that the data attached to the indicators are reliable, regularly collected, known and used by policy makers, and broadly disseminated to the media and the population at large. Disaggregation of data is a major issue at stake as this is the finest way to compare the real impact of policies on groups according to age, gender, ethnic backgrounds, education attainment, income level and places of residence. Equally important, it is the only possibility to track inequalities in terms of poverty, access to health and education, territories, social status, etc.

Success in the effective implementation of the SDGs in Ukraine will depend on the capacity to create an open platform gathering a wide range of partners willing to participate in the shaping of the SDGs, and subsequently in their monitoring. The government will have a key role in this regard and it is expected that the SDG framework, once established, will be fully taken into consideration in the various governmental processes of strategic planning, macroeconomic forecasting and development programming, as well as in the reform documents of the country. It could even be envisaged that in part or in all, the existing strategies and planning documents be subsumed within the future SDG framework for Ukraine.
